Methods

Theoretical

Transport quantum mechanics

Tunnelling of two interacting particles moving parallel or antiparallel. A comparative analysis, Y.I. Dakhnovskii and M.B. Semenov 183 (1994) 1

Solvation dynamics of LDS 750 in associative liquids by degenerate four-wave mixing and time-resolved emission techniques, S.Y. Goldberg, E. Bart, A. Meltsin, B.D. Fainberg and D. Huppert 183 (1994) 217

Numerical evaluation of golden rule rates for condensed phase processes, E. Neria and A. Nitzan 183 (1994) 351

Modification of tunneling dynamics by the application of random external fields, R.I. Cukier and M. Morillo 183 (1994) 375

Equilibrium statistical mechanics

A simple cluster model for the description of liquid water: temperature effects, A.K. Karmakar and R.N. Joarder 183 (1994) 11

Statistical mechanics of stationary states

Rate processes in dissipative systems: scaling in the canonical variational transition state theory, S. Singh and G.W. Robinson 183 (1994) 365

Non-equilibrium thermodynamic and hydrodynamic theories

Surrogate Hamiltonian description of solvation dynamics. Resolution of global responses into spatial profiles , F.O. Raineri, B.-C. Perng and H.L. Friedman 183 (1994) 187

Solvation dynamics, energy distribution and trapping of a light solute ion, S. Roy and B. Bagchi 183 (1994) 207

Bihalide ion combination reactions in solution: electronic structure and solvation aspects, B.J. Gertner, K. Ando, R. Bianco and J.T. Hynes 183 (1994) 309

Vibrational relaxation in simple fluids: a comparison of experimental results to the predictions of isolated binary collision theory, D.J. Russell and C.B. Harris 183 (1994) 325

Rate processes in dissipative systems: scaling in the canonical variational transition state theory, S. Singh and G.W. Robinson 183 (1994) 365

Translational and rotational dynamics in liquids. Comparison of experiment, kinetic theory and hydrodynamics, R. Ravi and D. Ben-Amotz 183 (1994) 385

Ab initio schemes for stationary properties

Some remarks on the use of the three-term recurrence method in the configuration interaction eigenvalue problem, J.M. Bofill and J.M. Anglada 183 (1994) 19

Theoretical study of the dimethylamino radical $(CH_3)_2N$ and its protonated cation $(CH_3)_2NH^+$, M.-B. Huang, H.U. Suter and B. Engels 183 (1994) 27

Ab initio investigation of the circular dichroism spectra of methylthiirane and trans-2,3-dimethylthiirane, M. Carnell and S.D. Peyerimhoff 183 (1994) 37

Bistable mixed-valence molecular architectures for bit storage, N. Guihery, G. Durand and M.-B. Lepetit 183 (1994) 45

Bistability in molecular donor–acceptor complexes, N. Guihery, G. Durand, M.-B. Lepetit and J.-P. Malrieu 183 (1994) 61

Quantum-chemical ab initio investigation of the electrochemical hydrogen reaction: local potential and local charge patterns of a hydrated hydrogen intermediate on Cu(100), An.M. Kuznetsov and W. Lorenz 183 (1994) 73

Computational and simulation methods

Some remarks on the use of the three-term recurrence method in the configuration interaction eigenvalue problem, J.M. Bofill and J.M. Anglada 183 (1994) 19

Quantum chemical calculation of geometry, vibration spectrum, absorption and emission spectrum of *p*-cyano-*p'*-methyl thiodiphenylacetylene, A. Broo 183 (1994) 85

Transition state theory and Eckart's tunneling factor: a good approximation for the calculation of bimolecular rate constants?, J. Espinosa-García, F.J. Olivares del Valle and J.C. Corchado 183 (1994) 95

Molecular dynamics of copper plastocyanin: simulations of structure and dynamics as a function of hydration, C.X. Wang, A.R. Bizzarri, Y.W. Xu and S. Cannistraro 183 (1994) 155

Femtosecond spectral evolution monitoring the bond-twisting event in barrierless isomerization in solution, U. Åberg, E. Åkesson, J.-L. Alvarez, I. Fedchenia and V. Sundström 183 (1994) 269

Vibrational relaxation of nascent diiodide ions studied by femtosecond transient resonance impulsive stimulated Raman scattering (TRISRS); experiment and simulation, U. Banin, R. Kosloff and S. Ruhman 183 (1994) 289

A semiclassical surface hopping formalism for solvent-induced vibrational relaxation, M.F. Herman and J.C. Arce 183 (1994) 335

Numerical evaluation of golden rule rates for condensed phase processes, E. Neria and A. Nitzan 183 (1994) 351

Molecular dynamics and scattering theory

Vibrational excitation of $H_2(X\ ^1\Sigma_g^+, v)/D_2(X\ ^1\Sigma_g^+, v)$ through excitation of electronically excited singlet states and radiative cascade, R. Celiberto, M. Capitelli and U.T. Lamanna 183 (1994) 101

Adiabatic wave-packet motion on conically intersecting potential energy surfaces. The case of $SO_2(^1B_1–^1A_2)$, H. Müller and H. Köppel 183 (1994) 107

Molecular dynamics of copper plastocyanin: simulations of structure and dynamics as a function of hydration, C.X. Wang, A.R. Bizzarri, Y.W. Xu and S. Cannistraro 183 (1994) 155

A semiclassical surface hopping formalism for solvent-induced vibrational relaxation, M.F. Herman and J.C. Arce 183 (1994) 335

Experimental

Infrared spectroscopy
FT infrared study of sulfur dioxide dimer. I. Nitrogen matrix, M. Wierzejewska-Hnat, A. Schriver and L. Schriver-Mazzuoli 183 (1994) 117

Visible and UV spectroscopy
The 248 nm photolysis of phosphorus trichloride and phosphorus tribromide, M.J. Bramwell, C. Hughes, S.E. Jaeger and J.C. Whitehead 183 (1994) 127
Quantitative analysis of wavelength and temperature dependence of laser-induced hole filling in photochemical hole-burning, N. Murase and K. Horie 183 (1994) 135

Picosecond spectroscopy
Solvation dynamics, energy distribution and trapping of a light solute ion, S. Roy and B. Bagchi 183 (1994) 207
Estimating the time-zero spectrum in time-resolved emission measurements of solvation dynamics, R.S. Fee and M. Maroncelli 183 (1994) 235
The role of multiple electronic states in the dissipative energy dynamics of coumarin 153, Y. Jiang, P.K. McCarthy and G.J. Blanchard 183 (1994) 249
Femtosecond spectral evolution monitoring the bond-twisting event in barrierless isomerization in solution, U. Åberg, E. Åkesson, J.-L. Alvarez, I. Fedchenia and V. Sundström 183 (1994) 269
Self quenching of 1-naphthol. Connection between time-resolved and steady-state measurements, E. Pines and G.R. Fleming 183 (1994) 393

Non-linear optical spectroscopy
Solvation dynamics of LDS 750 in associative liquids by degenerate four-wave mixing and time-resolved emission techniques, S.Y. Goldberg, E. Bart, A. Meltsin, B.D. Fainberg and D. Huppert 183 (1994) 217

Coherent optical spectroscopy
Ultrafast electronic fluctuation and solvation in liquids, E.T.J. Nibbering, D.A. Wiersma and K. Duppen 183 (1994) 167

Time-resolved experiments
Positive hole mobility in liquid xenon, O. Hilt and W.F. Schmidt 183 (1994) 147
Solvation dynamics of LDS 750 in associative liquids by degenerate four-wave mixing and time-resolved emission techniques, S.Y. Goldberg, E. Bart, A. Meltsin, B.D. Fainberg and D. Huppert 183 (1994) 217
Estimating the time-zero spectrum in time-resolved emission measurements of solvation dynamics, R.S. Fee and M. Maroncelli 183 (1994) 235
The role of multiple electronic states in the dissipative energy dynamics of coumarin 153, Y. Jiang, P.K. McCarthy and G.J. Blanchard 183 (1994) 249
Vibrational relaxation of nascent diiodide ions studied by femtosecond transient resonance impulsive stimulated Raman scattering (TRISRS); experiment and simulation, U. Banin, R. Kosloff and S. Ruhman 183 (1994) 289

Radiolysis
Positive hole mobility in liquid xenon, O. Hilt and W.F. Schmidt 183 (1994) 147

Objects

Bulk systems

Gases
The 248 nm photolysis of phosphorus trichloride and phosphorus tribromide, M.J. Bramwell, C. Hughes, S.E. Jaeger and J.C. Whitehead 183 (1994) 127

Liquids neat
A simple cluster model for the description of liquid water: temperature effects, A.K. Karmakar and R.N. Joarder 183 (1994) 11
Positive hole mobility in liquid xenon, O. Hilt and W.F. Schmidt 183 (1994) 147
Estimating the time-zero spectrum in time-resolved emission measurements of solvation dynamics, R.S. Fee and M. Maroncelli 183 (1994) 235
Vibrational relaxation in simple fluids: a comparison of experimental results to the predictions of isolated binary collision theory, D.J. Russell and C.B. Harris 183 (1994) 325
Rate processes in dissipative systems: scaling in the canonical variational transition state theory, S. Singh and G.W. Robinson 183 (1994) 365

Liquids mixtures and solutions
Ultrafast electronic fluctuation and solvation in liquids, E.T.J. Nibbering, D.A. Wiersma and K. Duppen 183 (1994) 167
Solvation dynamics, energy distribution and trapping of a light solute ion, S. Roy and B. Bagchi 183 (1994) 207
Solvation dynamics of LDS 750 in associative liquids by degenerate four-wave mixing and time-resolved emission techniques, S.Y. Goldberg, E. Bart, A. Meltsin, B.D. Fainberg and D. Huppert 183 (1994) 217
The role of multiple electronic states in the dissipative energy dynamics of coumarin 153, Y. Jiang, P.K. McCarthy and G.J. Blanchard 183 (1994) 249
Femtosecond spectral evolution monitoring the bond-twisting event in barrierless isomerization in solution, U. Åberg, E. Åkesson, J.-L. Alvarez, I. Fedchenia and V. Sundström 183 (1994) 269
A semiclassical surface hopping formalism for solvent-induced vibrational relaxation, M.F. Herman and J.C. Arce 183 (1994) 335
Translational and rotational dynamics in liquids. Comparison of experiment, kinetic theory and hydrodynamics, R. Ravi and D. Ben-Amotz 183 (1994) 385
Self quenching of 1-naphthol. Connection between time-resolved and steady-state measurements, E. Pines and G.R. Fleming 183 (1994) 393

Glasses
Quantitative analysis of wavelength and temperature dependence of laser-induced hole filling in photochemical hole-burning, N. Murase and K. Horie 183 (1994) 135

Polymers
Quantitative analysis of wavelength and temperature dependence of laser-induced hole filling in photochemical hole-burning, N. Murase and K. Horie 183 (1994) 135

Dielectrics
Quantum chemical calculation of geometry, vibration spectrum, absorption and emission spectrum of *p*-cyano-*p'*-methyl thiodiphenylacetylene, A. Broo 183 (1994) 85

Plasmas
Vibrational excitation of $H_2(X\ ^1\Sigma_g^+, v)/D_2(X\ ^1\Sigma_g^+, v)$ through excitation of electronically excited singlet states and radiative cascade, R. Celiberto, M. Capitelli and U.T. Lamanna 183 (1994) 101

Biological systems
Molecular dynamics of copper plastocyanin: simulations of structure and dynamics as a function of hydration, C.X. Wang, A.R. Bizzarri, Y.W. Xu and S. Cannistraro 183 (1994) 155

Microscopic systems

Atoms
Transition state theory and Eckart's tunneling factor: a good approximation for the calculation of bimolecular rate constants?, J. Espinosa-García, F.J. Olivares del Valle and J.C. Corchado 183 (1994) 95

Molecules (neutral and ionic)
Some remarks on the use of the three-term recurrence method in the configuration interaction eigenvalue problem, J.M. Bofill and J.M. Anglada 183 (1994) 19
Vibrational excitation of $H_2(X\ ^1\Sigma_g^+, v)/D_2(X\ ^1\Sigma_g^+, v)$ through excitation of electronically excited singlet states and radiative cascade, R. Celiberto, M. Capitelli and U.T. Lamanna 183 (1994) 101
Adiabatic wave-packet motion on conically intersecting potential energy surfaces. The case of $SO_2(^1B_1-^1A_2)$, H. Müller and H. Köppel 183 (1994) 107
Solvation dynamics of LDS 750 in associative liquids by degenerate four-wave mixing and time-resolved emission techniques, S.Y. Goldberg, E. Bart, A. Meltsin, B.D. Fainberg and D. Huppert 183 (1994) 217
Vibrational relaxation in simple fluids: a comparison of experimental results to the predictions of isolated binary collision theory, D.J. Russell and C.B. Harris 183 (1994) 325
Modification of tunneling dynamics by the application of random external fields, R.I. Cukier and M. Morillo 183 (1994) 375

–diatomic
Transition state theory and Eckart's tunneling factor: a good approximation for the calculation of bimolecular rate constants?, J. Espinosa-García, F.J. Olivares del Valle and J.C. Corchado 183 (1994) 95
Vibrational excitation of $H_2(X\ ^1\Sigma_g^+, v)/D_2(X\ ^1\Sigma_g^+, v)$ through excitation of electronically excited singlet states and radiative cascade, R. Celiberto, M. Capitelli and U.T. Lamanna 183 (1994) 101
Vibrational relaxation of nascent diiodide ions studied by femtosecond transient resonance impulsive stimulated Raman scattering (TRISRS); experiment and simulation, U. Banin, R. Kosloff and S. Ruhman 183 (1994) 289

–small polyatomics
Theoretical study of the dimethylamino radical $(CH_3)_2N$ and its protonated cation $(CH_3)_2NH^+$, M.-B. Huang, H.U. Suter and B. Engels 183 (1994) 27
Ab initio investigation of the circular dichroism spectra of methylthiirane and trans-2,3-dimethylthiirane, M. Carnell and S.D. Peyerimhoff 183 (1994) 37
Adiabatic wave-packet motion on conically intersecting potential energy surfaces. The case of $SO_2(^1B_1–^1A_2)$, H. Müller and H. Köppel 183 (1994) 107
The 248 nm photolysis of phosphorus trichloride and phosphorus tribromide, M.J. Bramwell, C. Hughes, S.E. Jaeger and J.C. Whitehead 183 (1994) 127
Surrogate Hamiltonian description of solvation dynamics. Resolution of global responses into spatial profiles , F.O. Raineri, B.-C. Perng and H.L. Friedman 183 (1994) 187
Translational and rotational dynamics in liquids. Comparison of experiment, kinetic theory and hydrodynamics, R. Ravi and D. Ben-Amotz 183 (1994) 385

–aromatics
Bistability in molecular donor–acceptor complexes, N. Guihery, G. Durand, M.-B. Lepetit and J.-P. Malrieu 183 (1994) 61
Quantum chemical calculation of geometry, vibration spectrum, absorption and emission spectrum of *p*-cyano-*p'*-methyl thiodiphenylacetylene, A. Broo 183 (1994) 85
Estimating the time-zero spectrum in time-resolved emission measurements of solvation dynamics, R.S. Fee and M. Maroncelli 183 (1994) 235
Femtosecond spectral evolution monitoring the bond-twisting event in barrierless isomerization in solution, U. Åberg, E. Åkesson, J.-L. Alvarez, I. Fedchenia and V. Sundström 183 (1994) 269
Self quenching of 1-naphthol. Connection between time-resolved and steady-state measurements, E. Pines and G.R. Fleming 183 (1994) 393

–other large
Bistable mixed-valence molecular architectures for bit storage, N. Guihery, G. Durand and M.-B. Lepetit 183 (1994) 45
The role of multiple electronic states in the dissipative energy dynamics of coumarin 153, Y. Jiang, P.K. McCarthy and G.J. Blanchard 183 (1994) 249

Molecular aggregates
FT infrared study of sulfur dioxide dimer. I. Nitrogen matrix, M. Wierzejewska-Hnat, A. Schriver and L. Schriver-Mazzuoli 183 (1994) 117

–dimers
Bistability in molecular donor–acceptor complexes, N. Guihery, G. Durand, M.-B. Lepetit and J.-P. Malrieu 183 (1994) 61
FT infrared study of sulfur dioxide dimer. I. Nitrogen matrix, M. Wierzejewska-Hnat, A. Schriver and L. Schriver-Mazzuoli 183 (1994) 117

–clusters
A simple cluster model for the description of liquid water: temperature effects, A.K. Karmakar and R.N. Joarder 183 (1994) 11

–complexes
Bistable mixed-valence molecular architectures for bit storage, N. Guihery, G. Durand and M.-B. Lepetit 183 (1994) 45
Quantum-chemical ab initio investigation of the electrochemical hydrogen reaction: local potential and local charge patterns of a hydrated hydrogen intermediate on Cu(100), An.M. Kuznetsov and W. Lorenz 183 (1994) 73

Free radicals (including hydronium and muonium)
Theoretical study of the dimethylamino radical $(CH_3)_2N$ and its protonated cation $(CH_3)_2NH^+$, M.-B. Huang, H.U. Suter and B. Engels 183 (1994) 27

Ions and charge carriers
Positive hole mobility in liquid xenon, O. Hilt and W.F. Schmidt 183 (1994) 147
Solvation dynamics, energy distribution and trapping of a light solute ion, S. Roy and B. Bagchi 183 (1994) 207
Bihalide ion combination reactions in solution: electronic structure and solvation aspects, B.J. Gertner, K. Ando, R. Bianco and J.T. Hynes 183 (1994) 309

Phenomena

Molecular structure
A simple cluster model for the description of liquid water: temperature effects, A.K. Karmakar and R.N. Joarder 183 (1994) 11
Theoretical study of the dimethylamino radical $(CH_3)_2N$ and its protonated cation $(CH_3)_2NH^+$, M.-B. Huang, H.U. Suter and B. Engels 183 (1994) 27
Quantum chemical calculation of geometry, vibration spectrum, absorption and emission spectrum of *p*-cyano-*p'*-methyl thiodiphenylacetylene, A. Broo 183 (1994) 85
FT infrared study of sulfur dioxide dimer. I. Nitrogen matrix, M. Wierzejewska-Hnat, A. Schriver and L. Schriver-Mazzuoli 183 (1994) 117

Vibrations and rotations of molecules
A semiclassical surface hopping formalism for solvent-induced vibrational relaxation, M.F. Herman and J.C. Arce 183 (1994) 335

Electronic structure and states
Some remarks on the use of the three-term recurrence method in the configuration interaction eigenvalue problem, J.M. Bofill and J.M. Anglada 183 (1994) 19
Ab initio investigation of the circular dichroism spectra of methylthiirane and trans-2,3-dimethylthiirane, M. Carnell and S.D. Peyerimhoff 183 (1994) 37
Bistable mixed-valence molecular architectures for bit storage, N. Guihery, G. Durand and M.-B. Lepetit 183 (1994) 45
Bistability in molecular donor–acceptor complexes, N. Guihery, G. Durand, M.-B. Lepetit and J.-P. Malrieu 183 (1994) 61
Quantum-chemical ab initio investigation of the electrochemical hydrogen reaction: local potential and local charge patterns of a hydrated hydrogen intermediate on Cu(100), An.M. Kuznetsov and W. Lorenz 183 (1994) 73

The 248 nm photolysis of phosphorus trichloride and phosphorus tribromide, M.J. Bramwell, C. Hughes, S.E. Jaeger and J.C. Whitehead 183 (1994) 127
The role of multiple electronic states in the dissipative energy dynamics of coumarin 153, Y. Jiang, P.K. McCarthy and G.J. Blanchard 183 (1994) 249

Electric and magnetic properties
Theoretical study of the dimethylamino radical $(CH_3)_2N$ and its protonated cation $(CH_3)_2NH^+$, M.-B. Huang, H.U. Suter and B. Engels 183 (1994) 27

Optical activity
Ab initio investigation of the circular dichroism spectra of methylthiirane and trans-2,3-dimethylthiirane, M. Carnell and S.D. Peyerimhoff 183 (1994) 37

Molecular interactions
Surrogate Hamiltonian description of solvation dynamics. Resolution of global responses into spatial profiles , F.O. Raineri, B.-C. Perng and H.L. Friedman 183 (1994) 187

Coupling of electronic and nuclear motion
Ultrafast electronic fluctuation and solvation in liquids, E.T.J. Nibbering, D.A. Wiersma and K. Duppen 183 (1994) 167

Energy transfer processes
A semiclassical surface hopping formalism for solvent-induced vibrational relaxation, M.F. Herman and J.C. Arce 183 (1994) 335

Molecular photophysical processes
Surrogate Hamiltonian description of solvation dynamics. Resolution of global responses into spatial profiles , F.O. Raineri, B.-C. Perng and H.L. Friedman 183 (1994) 187

Intramolecular dynamics
Adiabatic wave-packet motion on conically intersecting potential energy surfaces. The case of $SO_2(^1B_1-^1A_2)$, H. Müller and H. Köppel 183 (1994) 107
Femtosecond spectral evolution monitoring the bond-twisting event in barrierless isomerization in solution, U. Åberg, E. Åkesson, J.-L. Alvarez, I. Fedchenia and V. Sundström 183 (1994) 269

–radiationless transitions
Adiabatic wave-packet motion on conically intersecting potential energy surfaces. The case of $SO_2(^1B_1-^1A_2)$, H. Müller and H. Köppel 183 (1994) 107
Numerical evaluation of golden rule rates for condensed phase processes, E. Neria and A. Nitzan 183 (1994) 351

–vibrational energy redistribution (including vibrational dissociation)
Vibrational relaxation of nascent diiodide ions studied by femtosecond transient resonance impulsive stimulated Raman scattering (TRISRS); experiment and simulation, U. Banin, R. Kosloff and S. Ruhman 183 (1994) 289

Coherence loss processes
Ultrafast electronic fluctuation and solvation in liquids, E.T.J. Nibbering, D.A. Wiersma and K. Duppen 183 (1994) 167

Reactions (including dissociation)
Bihalide ion combination reactions in solution: electronic structure and solvation aspects, B.J. Gertner, K. Ando, R. Bianco and J.T. Hynes 183 (1994) 309

–gas phase
Transition state theory and Eckart's tunneling factor: a good approximation for the calculation of bimolecular rate constants?, J. Espinosa-García, F.J. Olivares del Valle and J.C. Corchado 183 (1994) 95
The 248 nm photolysis of phosphorus trichloride and phosphorus tribromide, M.J. Bramwell, C. Hughes, S.E. Jaeger and J.C. Whitehead 183 (1994) 127

–condensed phase
Quantum-chemical ab initio investigation of the electrochemical hydrogen reaction: local potential and local charge patterns of a hydrated hydrogen intermediate on Cu(100), An.M. Kuznetsov and W. Lorenz 183 (1994) 73
Bihalide ion combination reactions in solution: electronic structure and solvation aspects, B.J. Gertner, K. Ando, R. Bianco and J.T. Hynes 183 (1994) 309
Numerical evaluation of golden rule rates for condensed phase processes, E. Neria and A. Nitzan 183 (1994) 351
Rate processes in dissipative systems: scaling in the canonical variational transition state theory, S. Singh and G.W. Robinson 183 (1994) 365
Modification of tunneling dynamics by the application of random external fields, R.I. Cukier and M. Morillo 183 (1994) 375
Self quenching of 1-naphthol. Connection between time-resolved and steady-state measurements, E. Pines and G.R. Fleming 183 (1994) 393

–photochemical
Quantitative analysis of wavelength and temperature dependence of laser-induced hole filling in photochemical hole-burning, N. Murase and K. Horie 183 (1994) 135
Self quenching of 1-naphthol. Connection between time-resolved and steady-state measurements, E. Pines and G.R. Fleming 183 (1994) 393

Tunneling
Tunnelling of two interacting particles moving parallel or antiparallel. A comparative analysis, Y.I. Dakhnovskii and M.B. Semenov 183 (1994) 1
Transition state theory and Eckart's tunneling factor: a good approximation for the calculation of bimolecular rate constants?, J. Espinosa-García, F.J. Olivares del Valle and J.C. Corchado 183 (1994) 95
Modification of tunneling dynamics by the application of random external fields, R.I. Cukier and M. Morillo 183 (1994) 375

Electron transfer
Bistable mixed-valence molecular architectures for bit storage, N. Guihery, G. Durand and M.-B. Lepetit 183 (1994) 45

Bistability in molecular donor–acceptor complexes, N. Guihery, G. Durand, M.-B. Lepetit and J.-P. Malrieu 183 (1994) 61
Quantum chemical calculation of geometry, vibration spectrum, absorption and emission spectrum of *p*-cyano-*p'*-methyl thiodiphenylacetylene, A. Broo 183 (1994) 85
Positive hole mobility in liquid xenon, O. Hilt and W.F. Schmidt 183 (1994) 147
Bihalide ion combination reactions in solution: electronic structure and solvation aspects, B.J. Gertner, K. Ando, R. Bianco and J.T. Hynes 183 (1994) 309
Numerical evaluation of golden rule rates for condensed phase processes, E. Neria and A. Nitzan 183 (1994) 351
Modification of tunneling dynamics by the application of random external fields, R.I. Cukier and M. Morillo 183 (1994) 375

Molecular motion (including diffusive)
Surrogate Hamiltonian description of solvation dynamics. Resolution of global responses into spatial profiles , F.O. Raineri, B.-C. Perng and H.L. Friedman 183 (1994) 187
Estimating the time-zero spectrum in time-resolved emission measurements of solvation dynamics, R.S. Fee and M. Maroncelli 183 (1994) 235
Translational and rotational dynamics in liquids. Comparison of experiment, kinetic theory and hydrodynamics, R. Ravi and D. Ben-Amotz 183 (1994) 385

Isotopic effects
FT infrared study of sulfur dioxide dimer. I. Nitrogen matrix, M. Wierzejewska-Hnat, A. Schriver and L. Schriver-Mazzuoli 183 (1994) 117

Fluctuations and noise
Ultrafast electronic fluctuation and solvation in liquids, E.T.J. Nibbering, D.A. Wiersma and K. Duppen 183 (1994) 167

Collective motion and excitations
Solvation dynamics, energy distribution and trapping of a light solute ion, S. Roy and B. Bagchi 183 (1994) 207

Structure of solids and liquids
A simple cluster model for the description of liquid water: temperature effects, A.K. Karmakar and R.N. Joarder 183 (1994) 11

Critical phenomena
Rate processes in dissipative systems: scaling in the canonical variational transition state theory, S. Singh and G.W. Robinson 183 (1994) 365
